Match Time is a two-tier system that allows a coach to both prepare for and analyse matches.

Preparation - This allows the coach to prepare his team sheet, formations & set piece routines prior to kick off.

Analysis - During the real time play (or watching replay) the coach can log minute by minute actions from the game. This includes goals, bookings, substitutes and set pieces to name a few. This information is then stored into the match library for ease of access and printing.

1. Select Team

In the team tab, click on the 'select team from squad' button to select individual players from your squad. These players appear automatically from your 'Player Records' squad.
